EnergyReports™ Analytics Edition

Advanced Building Portfolio Analytics
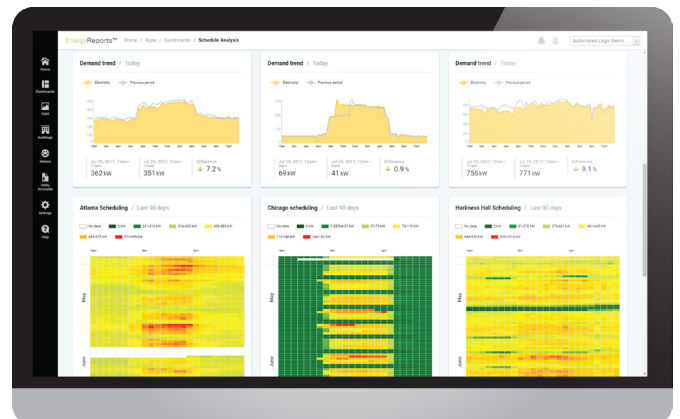

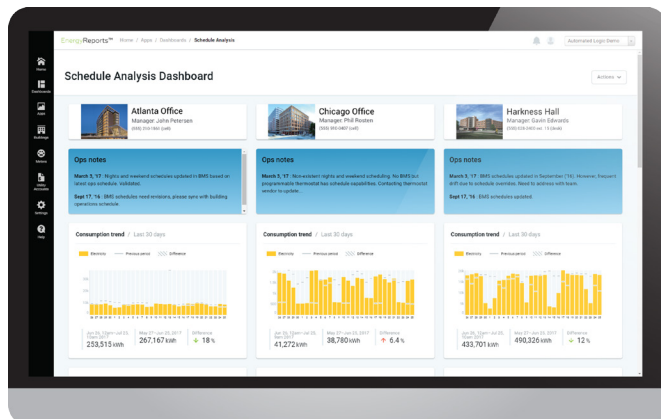

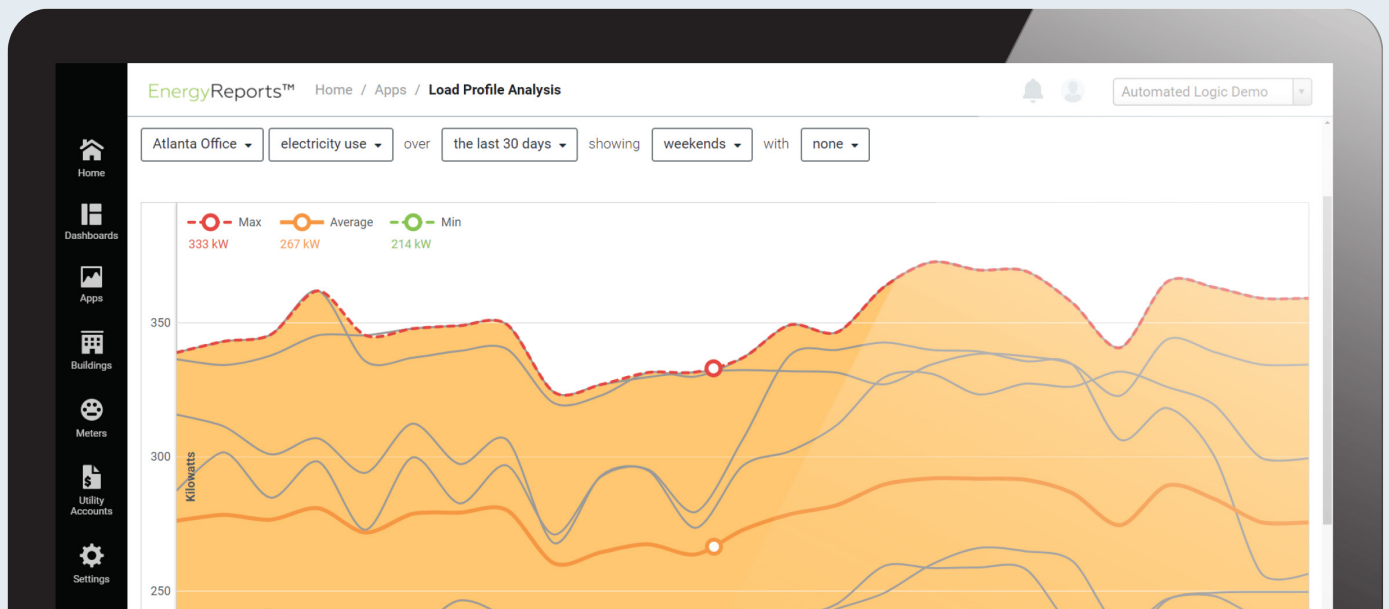

AUTOMATEDLOGIC
United Technologies

Part# ER-P

Faster, data-driven building energy management decisions

Leverage advanced analytics, machine learning, and actionable insights to reduce costs, save time, and forecast and track performance. The EnergyReports™ Analytics Edition builds upon the EnergyReports Dashboards Edition by adding several key analysis and visualization capabilities for advanced energy management across your building portfolio.

Find savings in scheduling, peak-demand, and drift inefficiencies:

- Minimize peak demand charges by staying on top of load profile and trending analysis to eliminate offending events.
- Identify scheduling inefficiencies with heat maps, or fluctuating building energy trends with drift maps, created with real-time data.
- Dig deep into the performance of a single building, or across your aggregated portfolio.

We make data **big.**™
Next level building automation engineered
to help you make smart decisions.

Automated Logic's Building Ecosystem

Technology today that supports the buildings of tomorrow

Need additional capabilities?

A commitment to excellence that circles the globe

Automated Logic's global network of authorized partners is composed of system integrators with proven experience in building automation, energy management and control. Our network of more than 150 company branches and independently owned dealers guides customers through the process of designing, engineering, installing and maintaining all of our building automation products.

EnergyReports™ Analytics Edition

Advanced Building Portfolio Analytics

Leverage advanced analytics, machine learning, and actionable insights to reduce costs, save time, and forecast and track performance. The EnergyReports™ Analytics Edition builds upon the EnergyReports Dashboards Edition by adding several key analysis and visualization capabilities for advanced energy management across your building porfolio.

EnergyReports™ Dashboards Edition

Dashboards, Reports, and Utility Bill Management

Building upon the EnergyReports™ Eco-Screen® Edition, the EnergyReports™ Dashboards Edition leverages the WebCTRL® building automation system to deliver a 360-degree view of building performance so stakeholders can meet their energy conservation and savings objectives. The EnergyReports Dashboards Edition allows operators to create and share graphs, charts, reports and dashboards to visualize building data.

EnergyReports™ Eco-Screen® Edition

Occupant Engagement

The EnergyReports™ Eco-Screen® Edition allows you to engage building occupants by showcasing your building's energy conservation and sustainability measures. It's an innovative way to bring your building to life, making its behind-the-scenes workings engaging and interactive.

WebCTRL® Secure Data Connector

Enterprise Level Security

A first in the industry, our connector establishes an authenticated (oAuth) push-based connection which provides outbound reporting of building & meter information and meter data to your EnergyReports cloud environment. The connector uses a secure and encrypted authenticated session (over SSL) which pushes information up to the cloud and does not require any inbound connectivity.

WebCTRL®

Building Automation Command and Control

The WebCTRL® building automation system gives you the ability to understand your building operations and analyze the results. The WebCTRL system integrates environmental, energy, security and safety systems into one powerful management tool that allows you to reduce energy consumption, increase occupant comfort, and achieve sustainable building operations.
